## ADULT MEDICAL QUESTIONNAIRE

Our ability to draw effective conclusions about your present state of health and how to improve it depends, to a significant extent, on your ability to respond thoughtfully and accurately to both these written questions and those posed by the clinician during your consultations. Health issues are usually influenced by many factors. Accurately assessing all the factors and comprehensively managing them is the best way to deal with these health challenges. Your careful consideration of each of the following questions will enhance our efficiency and will provide for more effective use of your scheduled consultation time. These questions will help to identify underlying causes of illness and will also assist us to formulate a treatment plan.

First Name:	_Middle Name:	Last Name:	_
Address:	City: _	State: ZIP:	
Home Phone: ()	<del>-</del>	Birth Date:/ Age: month day year
